

Mustad®

- A better way to fish

AUTOLINE™

Commercial Hooks for Autoline and Handbating

All of the Autoline hooks are designed to perform optimally in all of our baiting machines and hook separators.

Autoline Hooks

EZ Baiter hooks

39975DT (12/0-15/0)
39999DT (12/0-13/0)
39979DT (12/0-13/0)
40000DT (12/0)

Circle Hooks

39953DT (14/0)
39959DT (14/0 open ring)
39961DT (14/0)
39963DT (12/0-14/0)
39964DT (13/0)

Handbaiting Hooks

39960DT (10/0-16/0)
39965DT (10/0-16/0)
34184DT (4/0-5/0)
39977DT (10/0-13/0)
72950DT (5/0-7/0)
39971DT (11/0)
7255DT (6-9)

AUTOLINE™

Commercial Hooks for Autoline and Handbating

Long life seahooks. Due to increased pollution, ordinary fish hooks rust faster than ever before. To counteract this, Mustad developed the Duratin process, which makes hooks more rust resistant.

- Duratin Plus™ is our new process to significantly enhance the rust resistancy
- High carbon steel makes the hook stronger and more flexible

Mechanised longlining makes great demands on the quality of fish hooks, both in terms of dura-

bility and catch results. Hooks are under a heavy load and subjected to wear and tear, especially during setting and hauling. In addition, hooks must be able to withstand sufficient weight load before they straighten out.

Mustad has put much effort and resources into developing products that can meet the strictest requirements when it comes to **strenght, durability and rust resistance**. Due to advenced tempering processes and surface treatment, the hooks can take rough handling over a long period of time.
